

## Operating Instructions

1. Load dry cement into the drum using a shovel Add water to the mix using a flexible hose.
2. Discharge the mixed load by tilting the drum to the desired position using the steering wheel.

*Note: for safety purposes the machine is equipped with a drum lock, a cover around the pinion gear and a cover around the steering gear.*

Model

## Technical Data

Model		B1-510LT	B2-350LT
Drum Volume	L	510	350
Concrete Output	m <sup>3</sup> /hr	10	8
Power(Diesel Engine)	HP	5/7.5	5
Engine Speed	RPM	1500	1500
Length	cm	200	195
Width	cm	105	105
Height	cm	155	155
Weight	Kg	725	650
